

A heatmap visualization of the correlation matrix for 36 causes and effects. The x-axis is labeled 'Effect' and the y-axis is labeled 'Cause', both ranging from 0 to 35. The color scale on the right indicates correlation values from 0.3 (dark purple) to 0.7 (yellow). The diagonal elements are all 1.0 (yellow). The matrix shows a block-like structure with high correlations (yellow/orange) concentrated in the top-left and bottom-right quadrants, and lower correlations (purple) in the off-diagonal blocks.
